Dashboard Purpose

Track warehouse performance, identify high-risk orders, and monitor capacity utilization to improve on-time order completion.

EXECUTIVE OVERVIEW

Key performance insights and risk overview across all orders

11/8/2025

12/8/2025

TOTAL ORDERS

1901

100% of total

AVG COMPLETION TIME

401.6

Minutes/order

TOTAL WORKLOAD

772742

work minutes

DAILY CAPACITY

24300

work minutes

HIGH-RISK ORDERS

207

orders

HIGH-RISK RATE

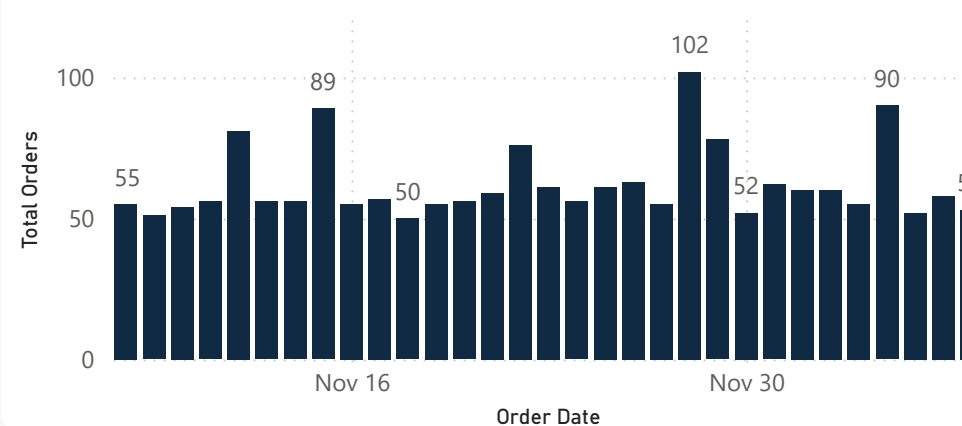

10.9%

of total orders

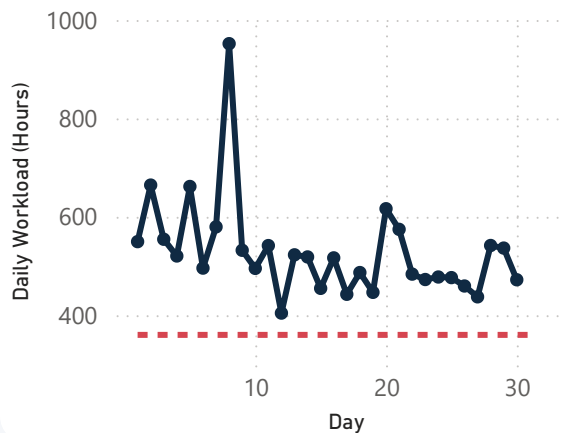

DAILY AVERAGE COMPLETION TIME

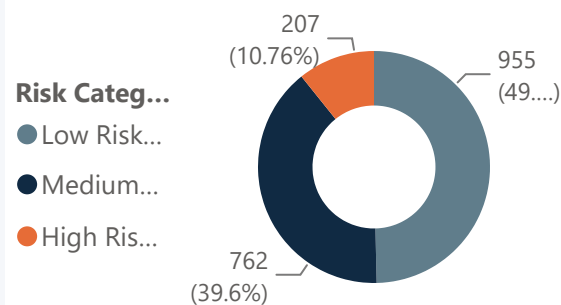

ORDERS COMPLETED OVER TIME

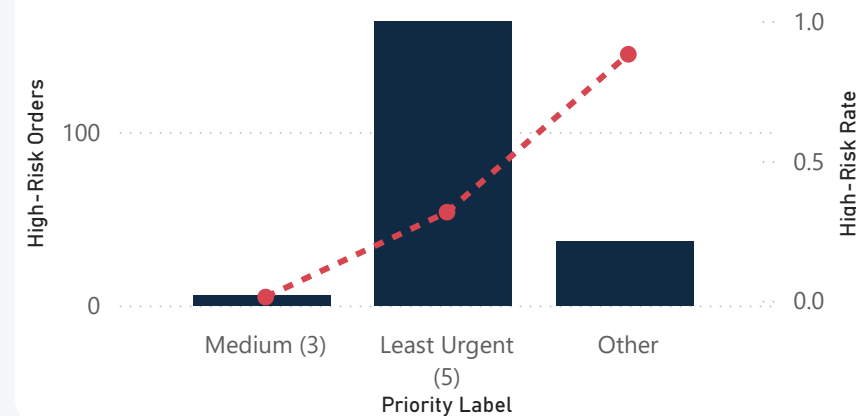

WORKLOAD vs CAPACITY

ORDER RISK DISTRIBUTION

HIGH-RISK ORDERS BY PRIORITY

How to use this dashboard

Page 2 helps you understand which zones drive delays and high-risk orders. Focus on zones with high causation rate and high risk share.
Note: High Risk = order completion time in the top 10% (90th percentile) for its day

ZONE PERFORMANCE & BOTTLENECKS

Identify high-impact zones causing order delays and operational risk

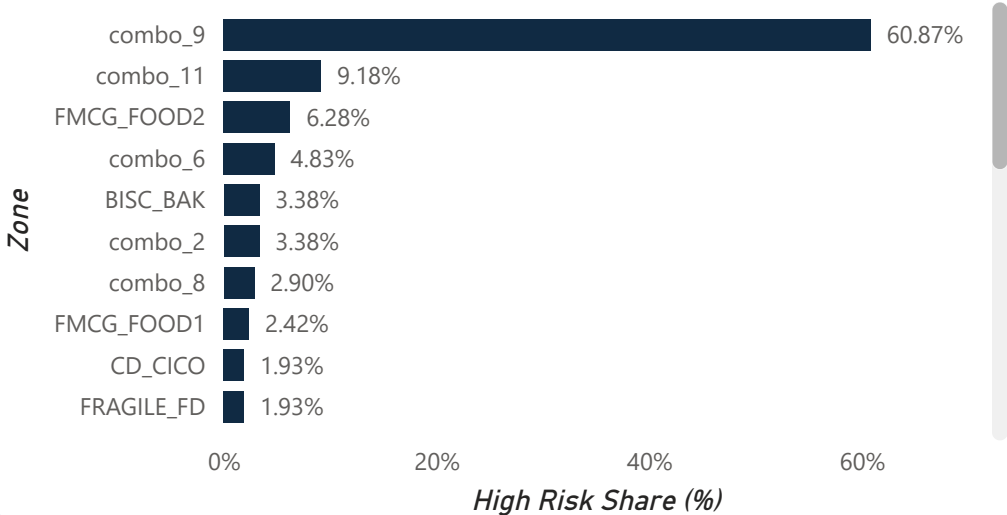

11/8/2025

12/8/2025

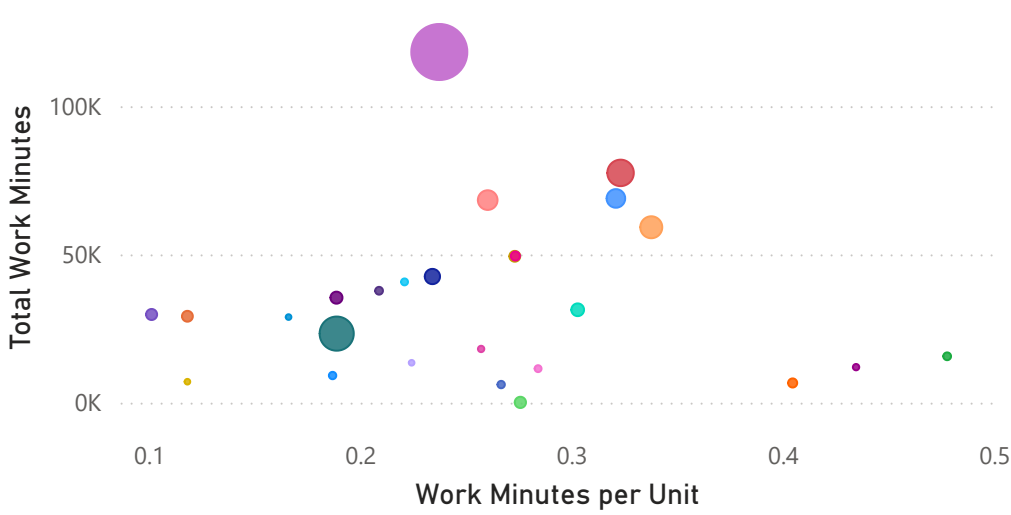

HIGH-RISK CONTRIBUTION BY ZONE

% of total high-risk orders caused (bottleneck zone)

WORKLOAD VS EFFICIENCY BY ZONE

Bubble size = Bottleneck occurrences (orders)

ZONE OPERATIONAL DETAILS

Bottleneck frequency, high-risk contribution and recommended action

zone	total_work_minutes	work_minutes_per_unit	times_bottleneck	times_caused_high_risk	high_risk_share	high_risk_causation_rate	action_category
combo_9	118,278.17	0.2375	978	126	60.87%	12.88%	Priority 1 - High Risk Impact
combo_11	77,499.00	0.3233	170	19	9.18%	11.18%	Priority 1 - High Risk Impact
FMCG_FOOD2	68,323.17	0.2604	83	13	6.28%	15.66%	Priority 1 - High Risk Impact
combo_6	68,887.58	0.3211	72	10	4.83%	13.89%	Priority 2 - Investigate
BISC_BAK	42,547.08	0.2343	43	7	3.38%	16.28%	Priority 2 - Investigate
combo_2	23,287.83	0.1890	305	7	3.38%	2.30%	Priority 2 - Investigate
